EXPERIENCE

ITI Intensive 3 month track , Aswan — *Frontend Dev.*

JULY 2021 - OCTOBER 2021

Worked with: React-Angular-React native-Flutter-Jest-Jasmine-Git.

This track expanded my mind in a Technical and non-technical points of view, exposed to experienced developers and an amazing community which I learned alot from.

Self-study — *Web Development*

JANUARY 2021 - CURRENT

A journey of consistent learning and self-discipline

Udacity — Web Development Nanodegree Program
Acquired Skills: HTML-CSS-Javascript-Node-Express.

Mahara-tech — Frontend Development
-Finished a lot of courses on the web and freelance.
Other Resources — Software Engineering

PROJECTS

Recipe Maker-Wasfity — *ITI Graduation Project*

Technologies used: React-React native-Redux-Firebase-Bootstrap-Git

- I was responsible for the client side containing the User-interface, firebase integration, routing, pagination, implementing the search filter, user validation and authentication.

Source code:
https://github.com/AmanySirajAl-Din/Wasfity-RecipeMaker

AXW Movies — *Full-featured Website*

Technologies used: React-Redux-Movies Api-Native CSS-HTML

Using the movies free api I made a complete application which you can search, watch, and download movies, with a modern easy to use user-interface and a lot of services.
Source code: https://github.com/yousefomar724/movies
